

Adjustable Precision Shunt Regulators

TL431RN3

Description

The TL431RN3 series are three-terminal adjustable regulators with guaranteed thermal stability over applicable temperature range. The output voltage may be set to any value between V_{REF} (approximately 2.500 volts) and 36 volts with two external resistors. These devices have a typical dynamic output impedance of 0.2Ω . Active output circuitry provides a very sharp turn-on characteristic, making these devices excellent replacement for zener diodes in many applications.

Features

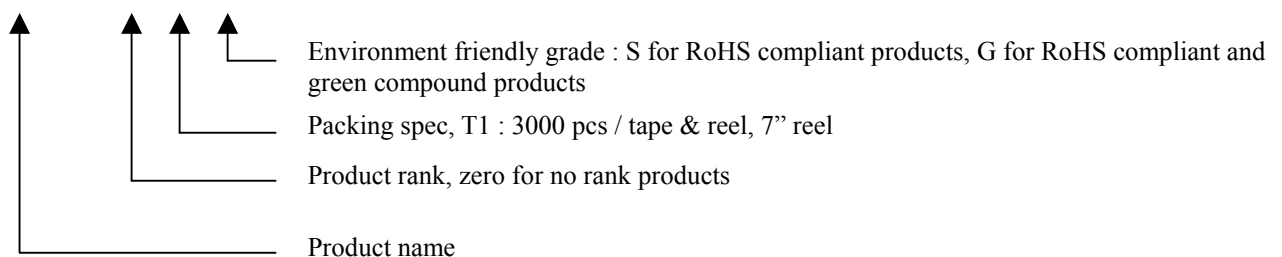

- Programmable output voltage
- Temperature coefficient is 20ppm/°C typical
- Temperature compensated for operation over full temperature range
- Low output noise voltage
- Fast turn on response
- Heat Resistance, Soldering iron : 350°C, 3 seconds
- Pb-free lead plating and halogen-free package

Classification

Rank	A	B	C
V_{REF}	$2.500\pm0.5\%$	$2.500\pm1\%$	$2.500\pm2\%$
